

ALTERNATIVE 1

(9 wards, 9 trustees, existing boundaries)

PWSD could maintain the current structure that it has, as this structure has some positive features such as: it maintains original wards, residents are familiar with the current structure, a new Education Act is expected and it may be better to wait to see what it contains. However, the issues with this structure include: population disparity as a general issue and specifically a concern that Ward 9 (Grovedale area) has a population which is outside the generally accepted band, is within the Grande Prairie trading area and it does not contain a high school. Also under this structure the Hythe and Beaverlodge service area remains separate.
