

This is a consolidation of what has been done to calculate Fee Waiver Thresholds.

Fee Waiver Thresholds

1. The Full Fee Waiver threshold is established annually based on the appropriate Statistics Canada Low Income Cut-Offs Before Tax, adjusted by the average Consumer Price Index (CPI) for Alberta. For the current school year, we will consider the previous year's pre-tax income for the applicant. (For example for 2017/2018 we would use 2016 information.)
2. The appropriate Statistics Canada Low Income document being used is *Low income cut-offs (1992 base) before tax* and referencing the latest figures, for calendar 2013. The 'Community size' column 'Rural areas outside CMA or CA' is used for outside of Grande Prairie area; and the column 'between 30,000 and 99,999 inhabitants' is used in the Grande Prairie area.
3. These numbers are adjusted upward by the average of the annual CPI adjustment for Alberta as indicated in *Statistics Canada Consumer Price Index (CPI), by province (Alberta)*.
4. The 50% Fee Waiver threshold will be set at four-thirds of the 100% Fee Waiver Threshold.
